Next Generation

## Plan de Recuperación Transformación y Resiliencia (PRTR)-Next Generation

Paradores is a state hotel net created in 1928 as a support of the tourism development in Spain, from that moment on the Paradores has increased up to 90 buildings, half of them located in historical buildings or at historical sites.

These Paradores hold the highest level of Cultural Heritage protection according to the Spanish State legislation on Cultural Heritage and their conservation and rehabilitation are essential to preserve the Spanish rich cultural and artistic heritage.

The conservation works have received a major boost thanks to the Recovery, Transformation and Resilience Plan (PRTR): the finance programme designed by the European Union to drive economic and social development in Member States after the Covid 19 Pandemic.

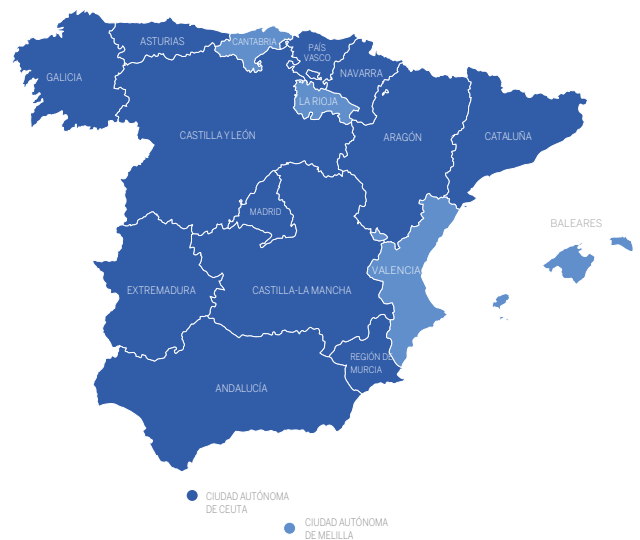

More specifically, the conservation and rehabilitation measures on historic heritage sites and buildings for touristic use, including the Paradores, are part of Component 14 focused on Tourism as a tool to drive economic development.

The Paradores historical buildings belong to the Spanish Tourism Institute (TURESPAÑA), a State institution tasked with the promotion of Spain as a touristic destination and to drive economic, social and environmental sustainability of national destinations.

The project led (managed) by TURESPAÑA will operate in 39 Paradores located in historic buildings and complexes in the Autonomous Communities of Andalucía, Aragón, Asturias, Castilla La Mancha, Castilla y León, Cataluña, Extremadura, Galicia, Madrid, Murcia, Navarra, País Vasco and the autonomous city of Ceuta.

The conservation works are focused on the historical areas open to the public.

## PARADOR OF RONDA

The current Parador is located in a building inaugurated in 1994 that preserves the facades of the former Town Hall and the market square.

Similarly, it is situated in the heart of the Historic Ensemble of the City of Ronda, protected as such since 1966.

## CONSERVATION ACTIONS FINANCED WITH NEXT-GENERATION FUNDS

The project will undertake interventions in the facades and cornices of the historical part of the building. These conservation actions include:

- Cleaning the facades.
- Addressing specific instances of detachment.

The estimated duration of the intervention is 8 months, with an approximate cost of €750,000.
